# Micro plate heat exchanger (MPHE): XB12

Description

Micro Plate Heat Exchangers - a revolutionary technology from Danfoss. Characterized by their unique plate pattern, MPHEs enable heat to be transferred more efficient than any previous model of heat exchangers.

**Benefits:**

- Energy and cost savings
- Better heat transfer
- Lower pressure loss
- More flexible design
- Longer life time

XB 12 is copper brazed heat exchanger, designed and configured for District Heating, District Cooling and other Heating applications. Heat exchanger XB12 will be available in plate corrugation H, M and L. It will be available in 1-pass (with 4 connections) and 2-pass version (with 6 connections). Heat exchangers can be dimensioned in Danfoss calculation software "Hexact" which can be downloaded from [hexact.danfoss.com](http://hexact.danfoss.com).

**Approval:**

Pressure Equipment Directive (PED) 97/23/EC.

Design and function

- T11 - Primary side in
- T12 - Primary side out
- T112 - Primary side second inlet (2-pass)
- T21 - Secondary side in
- T22 - Secondary side out
- T212 - Secondary side second inlet (2-pass)

Danfoss 2 pass heat exchangers are made with 6 connections, as they are primarily used to heat tap water.

There is one additional connection to allow circulation of hot water and one connection to connect and extract heat from return water from heating heat exchanger. Connections T112 and T212 can be blocked if they are not used.
